

A rechargeable wirefree system that combines a battery motor – featuring SYNC technology to provide synchronised movement when operating two or more blinds – with an adapter set which can be utilised with the SP45 internal roller blinds. Requiring no electrical wiring, the system features an inbuilt Lithium Ion battery which achieves an outstanding 200 cycles per charge. An optional solar powered charger will ensure the motor is continually charged, resulting in an environmentally friendly, energy efficient set and forget solution.

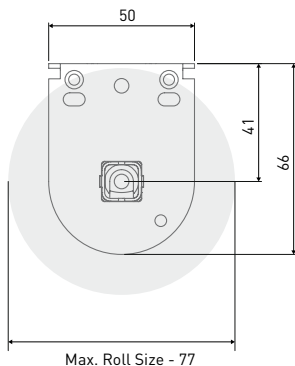

General information

Volts	7V
Current	0.8A
Weight capacity	5 Kg
Capacity	1.1Nm, 25 rpm
Protection class	IP40
Dimensions	24mm tubular motor diameter, 375mm length
Frequency	433.92MHz

All dimensions are in mm

Specifications

Aesthetic Features

- Slimline and compact roller blind system
- Contemporary remotes with optimal touch screen version
- Rechargeable battery hidden within motor

Assembly/Installation Benefits

- No electrical wiring and no electrician required
- Easy-Lock effortless installation
- Easy limit setting and programming

Functional Benefits

- Internal rechargeable Lithium-Ion battery
- Performs up to 220 cycles per charge
- Battery can be charged up to 500 times
- Optional solar powered charger
- Allows multiple blinds to operate with synchronised movement
- 1.1Nm torque, 25rpm
- 5kg weight capacity
- Single, five & fourteen channel stylish remotes
- Preferred position can be visualised on optimal touch screen remote
- 5 year motor warranty and 1 year battery warranty
- Childsafe solution
