

Project	Auckland Transport Operations Centre (ATOC)
Award rating	N/A
Location	Pier 1, Viaduct Harbour
Architect/Designer	Creative Spaces
Head contractor	Hawkins Constructions
Product	Dual manual roller blinds
System	SP45 chain control & Easy-Link™
Fabric	SP View® Char & Thermo Block® FR Dark Midnight

### The challenge

The three glass facades of this Viaduct Harbour office space are subjected to direct sunlight as well as reflected sunlight from Auckland's harbour, creating a very difficult working environment. Another challenge was to ensure privacy was maintained while working at night.

### The SP solution

For daytime, SP View® Char was selected with VLT (Visual Light Transmission) of just 8%, providing excellent glare reduction while maintaining a great view of the harbour.

For night time, Thermo Block® FR Dark Midnight was selected allowing privacy.
