

Project	New Lynn Health Centre
Award rating	N/A
Location	Auckland
Product	Chain controlled roller blinds
System	SP45 chain control
Fabric	SP View® Moonlight & Thermo Block® Gardenia

The challenge

SP Blinds were required to work directly with the project team, designers, property owners and sub tenants on the final specification of fabric on this project. Serving multiple masters is a difficult task at the best of times and this project was no different. The tenants wanted a safe, fresh and easily cleanable product whilst the designers and developers required a great looking, consistent result from the inside and out respectively.

The SP solution

SP Blinds were able to achieve buy-in from the designers, developers and tenants with the use of extremely durable fibreglass and PVC coated fabric with a clean white colour in keeping with the internal décor intent. The building is a significant statement in it's landscape and the window blinds in no way detract from that.
