

Project	Hobsonville Point Schools (Primary & Secondary)
Award rating	5 Star Green Build – Education Tool
Location	Hobsonville Point, Auckland
Architect/Designer	ASC Architects
Head contractor	Hawkins Constructions
Product	Chain controlled roller blinds
System	SP45 chain control
Fabric	SP View® E-Screen White Pearl & Thermo Block® Pewter

### The challenge

To provide clean neutral aesthetics with good visual properties that maximise views to the courtyards and play areas. The product needed to be robust, safe, fire retardant to meet the building code and easy to maintain and clean.

### The SP solution

The light grey SP View sunscreen provides plenty of natural light and good outward visibility in classrooms and public areas. The Duo Blind System – a combination of sunscreen & blockout blinds – was installed in the drama/dance rooms where alternative room darkening was needed.

The requirement for a robust product was satisfied by using SP Blinds' high quality operating system, with stainless steel chains and an SP View fiberglass/PVC sunscreen that is hard-wearing and easy maintenance. The safety aspect was addressed by using a highly fire-retardant fabric with a flammability index of 1 and a child-safety chain holder.
