

Project	Ironbank
Award rating	5 Star Greenbuild – Office Tool
Location	K' Rd
Architect/Designer	RTA Studio
Product	Chain controlled roller blinds
System	SP45 chain control
Fabric	SP View® E-Screen Charcoal Cocoa

#### The challenge

Another high profile Greenbuild from Samson Corporation required the most sturdy of blinds to cover a wide window expanse. This volume of glass cried out for great views but also excellent glare reduction.

#### The SP solution

In keeping with the environment a dark screen fabric which allows great views and carries a VLT of just 9 (the NZGBC awards points under IEQ 9 for blinds with a VLT of less than 10) suited perfectly. The large blinds are all constructed with heavy duty tubes and lifting is aided by appropriate helpersprings. This ensures ease of use and a minimum of product maintenance.
