

Project	Sugar Club Restaurant
Award rating	N/A
Location	Sky Tower, Auckland
Architect/Designer	Jasmax
Head contractor	Alaska Construction Interiors
Product	Motorised roller blinds
System	Remote control Agio™ automation
Fabric	Ecoview® Met Grey

The challenge

This 360 degree restaurant at the very top of Auckland's Sky Tower trades on its views whilst being exposed to sunlight from all directions throughout the day. The blinds needed to enable maximum view whilst serving to reduce the heat and glare build up throughout the day.

The SP solution

The Ecoview® sunscreen used features a 14% open weave with aluminium backing in a mid-range grey tone. This combination provides a comfortable view and prevents heat build-up within the restaurant, enhancing guest comfort and reducing air-conditioning costs.
