

Project	Te Atatu Library
Award rating	N/A
Location	595 Te Atatu Rd, Te Atatu, Auckland
Architect/Designer	Moller Architects
Product	Oversize roller blinds
System	SP60 chain control and S/S side guides
Fabric	Ecoview® Grey

### The challenge

A huge glass façade presents to the north and west looking over the park at the Te Atatu roundabout. This open community space is very exposed, light and bright, creating a relaxed environment. However the ability to reduce visible light in extreme situations was a major concern given that the building needs to be fit for the purpose as a library.

### The SP solution

Protection of this space required a two-fold approach with external fins working in conjunction with 5m long blinds. These blinds needed to be robust and 'safe' so installation was made with larger tube systems and stainless steel wire guides to ensure operational accuracy. Chains drops were left at heights inaccessible to small children to ensure safety.
