

Project	Watercare
Award rating	N/A
Location	73 Remuera Rd, Newmarket
Architect/Designer	Gaze Commercial
Product	Chain controlled sunscreen & blackout roller blinds
System	SP45 chain control
Fabric	SP View® Moonlight & Thermo Block® FR White

The challenge

As preferred supplier to Watercare sites across Auckland, SP Blinds had the inside running on this large project. The design brief required a crisp white sunscreen to allow plenty of natural light into the work environment. This created a need for blackout blinds to be used at certain hours of the day. A small recess allowed only very limited space for the installation of two blinds in each window.

The SP solution

Special slim duo brackets were fitted into the narrow recess and allowed the two sets of blinds to be fitted. The result is a large, light and open work space, as was the vision of the designer, combined with the practicality of blackout blinds when glare needs to be limited.
